Office Action Summary

Application No.

10/743,246

Applicant(s)

GARRISON ET AL.

Examiner

DANIEL TEKLE

Art Unit

2621

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 January 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-946)
- 3) ☐ Information Disclosure Statement(s) (PTO/SE/US)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Response to Argument

Applicant's arguments filed January 10, 2008 have been fully considered but they are not persuasive.

Applicant argument regarding claims 10-13, the examiner respectively disagree since the specification on page 9 paragraph 27 contains language (computer readable carrier..... contained signal bearing media) that makes claim 10-13 not statutory.

Applicant argument regarding claim 1, "Kobayashi does not have a "schedule" for when to store selected content in the future and thus does not teach the limitation of obtaining a storage schedule". In response the examiner disagrees. Kobayashi discloses "a switching preparation start time" on fig. 9, 18, 20 and 22. Switching between one storage to storage is work based on scheduling. Therefore Kobayashi more than adequately provides support for the claimed limitation "scheduling and deletion means".

Applicant argument regarding claim 3 "selecting time is not same with switching time interval of Kobayashi", in reply the examiner disagree since Kobayashi switching time is work on a selected switching time.

Applicant argument regarding claim 7, the examiner disagree since Kobayashi teach the use of MPEG1 and MPEG2 and both use different compression ration.

Applicant argument regarding claim 9, the examiner disagree since Kobayashi teaching copying data for a predetermined time preceding to present time into disk group for refuge (fig. 22).

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 10-13 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The specification page 9 paragraph 27 contains language that makes claim 10 non statutory. The term "computer readable medium" as used herein, refers to any medium, signal or carrier that provides information or is useable by a processor(s). This passage of the disclosure presents intrinsic evidence showing that Applicant intends for the term "medium" to cover something beyond physical articles or objects which are functionally or structurally interconnected with the instructions in such a manner as to enable the instructions to act as a computer component and realize their functionality. Since such a medium, signal or carrier that the term "computer readable medium" referred to may take many forms, including, but not limited to, non-volatile, volatile, and transmission media...Transmission media includes coaxial cable, copper wires and fiber optics, including the wires, i.e., electromagnetic waves that can be modulated, as in frequency, amplitude, or phase, to transmit information signals. Additionally, transmission media can take the form of acoustic or light waves, such as those generated during radio wave and infrared data communications. As such, claim 10 as written and in view of Applicant's disclosure page 9 paragraph 27 is not limited to a statutory subject matter and is therefore non-statutory.

The dependent claims included in the statement of rejection but not specifically addressed in the body of the rejection have inherent the deficiencies of their parent claim and have not resolved the deficiencies. Therefore, they are rejected based on the same rationale as applied to their parent claims above.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Kobayashi (US 6,108,728).

Regarding claim 1: Kobayashi discloses a method of representing allocation of storage unit capacity within an audio/video (AV) recording device, comprising: identifying a quantity of AV program data stored on said storage unit (**column 9 lines 1-7 and figure 5**); obtaining a storage schedule for new AV program data defined over a predetermined time period (**columns 2-3, lines 38-9**); obtaining a deletion schedule for old AV program data defined over said predetermined time period (**columns 11-12, lines 65-35**); and producing temporally dynamic indicia representative of allocation of capacity of storage unit over said predetermined time period in response to said quantity of AV

program data, said storage schedule, and said deletion schedule (**column 11-12 lines 65-35**).

Regarding claim 2: Kobayashi discloses a method of claim 1, further comprising: displaying a pictorial representation of said temporally dynamic indicia on a display device in communication with said AV recording device (**figure 5**).

Regarding claim 3: Kobayashi discloses a method of claim 1, wherein step of producing comprises: (a) selecting a time (**column 10 lines 1-30**); (b) determining a storage configuration of storage unit in response to quantity of AV program data, storage schedule, and deletion schedule at selected time (**column 10 lines 1-30**); (c) repeating steps (a) and (b) to determine a plurality of storage configurations for a respective plurality of times (**column 10 lines 1-30 and columns 11-12, lines 65-35**); and (d) combining plurality of storage configurations to form said temporally dynamic indicia (**figure 5**).

Regarding claim 4: Kobayashi discloses a method of claim 3, further comprising: successively displaying pictorial representations of plurality of storage configurations on a display device in communication with said AV recording device to define a graphical animation (**figure 5**).

Regarding claim 5: Kobayashi discloses a method of claim 4, wherein graphical animation comprises a pie chart (**figure 5**).

Regarding claim 6: Kobayashi discloses a method of claim 1, further comprising: modifying a recording configuration of AV recording device in response to temporally

Art Unit: 2621

dynamic indicia (**columns 11-12, lines 65-35**); and re-producing temporally dynamic indicia in response to modified recording configuration (**figure 5**).

Regarding claim 7: Kobayashi discloses a method of claim 6, wherein step of modifying comprises at least of: increasing compression ratio of an AV program stored on storage unit; and increasing compression ratio of an AV program scheduled for storage on storage unit (**column 4 lines 5-16**).

Regarding claim 8: Kobayashi discloses a method of claim 6, wherein step of modifying comprises: deleting an AV program stored on storage device (**column 11-12 lines 65-35**).

Regarding claim 9: Kobayashi discloses a method of claim 6, wherein step of modifying comprises: archiving an AV program stored on storage device (**columns 11-12 lines 65-35**).

Regarding claim 10: Claim 10 rejected for the same subject matter as claim 1.

Regarding claims 11-13: Claims 11-13 are rejected for the same subject matter as claim 4-6 respectively.

Regarding claims 14-20: Claims 14-20 are rejected for the same subject matter as claim 1-2 and 5-9 respectively.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANIEL TEKLE whose telephone number is (571)270-1117. The examiner can normally be reached on 7:30am to 5:00pm M-R and 7:30-4:00 Every other Friday..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha D. Banks-Harold can be reached on 571-272-7905. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
